

# Learning Checkpoint

Do you need a variation over your learning plan? If you answer “yes”, please justify and enter the requested dates in the table in the second section).

Please complete the following questions. They are designed to support your learning and help you develop your studying and time management skills by identifying the risks and opportunities, and reflecting on how you will engage with the unit, considering your external and internal constraints.

## Monitoring

1. Looking back at your previous goals, how well did you achieve them?

To be quite honest, it has been a little hard for me to keep up with the deadlines of the given tasks, but with time I think I'm getting back on track. I am slowly being able to complete all the given tasks within the given deadline and will continue to keep up with it.

2. Did you implement your plan as described in your previous checkpoint, or what changes did you make to it, and why?

- What did you end up doing?

*I won't say I ended up doing something wrong but obviously I couldn't maintain my pace which I was expecting I will.*

- Which resources did you end up using?

*As for resources, they did not change much, I expected that I will be using the provided resources and online texts available to deepen my understanding of the concepts and I did use them.*

- Were the changes to your plan your decision or a result of unforeseen circumstances?

*Yes. I was quite confident that I will cope up with the new surroundings, environment and circumstances being an international student. But homesickness did hit me hard and the affect can be seen on my studies . even though it is getting better day by day now, I need a little more time to be what I was planning to be.*

- In retrospect, is there anything you could/should have done but didn't?

*I could have acted more maturely and stayed strong about it but I could not.*

3. Was your risk assessment accurate? How did you go with managing it?

I encountered this new obstacle which was mental health being destroyed due to homesickness which I never expected because I believed I was strong enough to handle it. I am in a much better position now and im getting back on track. 😊

## Planning

1. What are your goals for the next three weeks?

my goal for the next three weeks is to complete all the remaining tasks with a good speed and get in touch with my tutors a little more.

2. How will you achieve those goals?

- Include any risk and external factor that you need to consider.

*The only risk right now for me is that I don't get weaker again. I need to be determined more on my goals and my passion which is computer science.*

- Include the resources that you plan to use.

*Apart from the resources I already mentioned I somewhere feel I should get in touch with my tutors a little more which I will be doing now.*

- How will you manage your time to implement your plan?

*I am going to stick to my timetable which I prepared.*

3. What risks do you anticipate, and how will you manage them?

*The only risk right now for me is that I don't get weaker again. I need to be determined more on my goals and my passion which is computer science.*

## Learning Plan Review

Review your learning plan below if necessary.

Module	Previous Plan	New Plan	Status
--------	---------------	----------	--------

### P tasks (Core Modules)

Number Theory

Propositional Logic

Predicate Logic

Sets and Functions

Relations and Graphs

Proofs

Recurrence and Induction

Counting

### C tasks (Advanced Modules)

Advanced Module 1

Advanced Module 2

### D tasks

Advanced Module 3

Own Topic
